Innovation Specialties Inc. does not manufacture the products inside of the convenience kits. We are classified as a relabeler and our items are assembled together for the convenience of our customer, which means they are assembled as kit and should not require 510k pre-market notification. All items that are required to be registered with the FDA are registered and the required registration numbers are listed above and are available for review per Quality System Regulation (21 C.F.R. 820).
