

STK24 (6" x 4" Sheet)

Import your artwork and use a magenta path to indicate the desired cut lines.

The cut line must add at least 1/8" of white border around the artwork.

For full bleed stickers, add a 1/8" bleed on all sides of the cut line.

Include at least 1/8" clear space between each sticker cut line.

For the cut lines, sharp corners and curves tighter than the edge of a 3/16" circle are not recommended. All cut line edges should be smooth and rounded for consistent cutting and easy peeling.
