

STK24H (6" x 4" Sheet)

Clear Holographic Sticker

Please note all printed areas of the sticker will NOT have a holographic appearance. Only areas left clear will show the holographic sticker material.

Import your artwork and use a magenta path to indicate the desired cut lines.
The cut line must add at least 1/8" of border around the artwork.
For full bleed stickers, add a 1/8" bleed on all sides of the cut line.
Include at least 1/8" clear space between each sticker cut line.

For the cut lines, sharp corners and curves tighter than the edge of a 3/16" circle are not recommended. All cut line edges should be smooth and rounded for consistent cutting and easy peeling.

All stickers must fit on the 6" x 4" sheet size indicated by the gray box.
Please include 3/16" clearance from each sticker cut line to the edge of the sheet.
